PROFILE

Creative designer and web developer with 8+ years of commercial design experience and hands-on work building and maintaining business websites. Combines brand identity, digital and print design with responsive front-end development and practical custom WordPress functionality. Experience includes custom plugins for lead capture, chatbots, booking forms and AI-assisted program search, alongside long-term design and development contributions for Capital Placement and Column.

CORE SKILLS

Development: HTML, CSS, JavaScript, WordPress, Divi customization, responsive layouts and custom website functionality.
Website support: content and layout updates, website management, responsive adjustments and troubleshooting.
Design: brand identity, typography, layout, UI/UX, digital campaigns, illustration and print artwork.
Tools: Figma, Adobe Illustrator, Photoshop, InDesign, After Effects, Animate and CorelDRAW.

SELECTED CLIENT EXPERIENCE

Capital Placement | 2+ years

Design, website development, management and maintenance

- Helped build the website across its core pages, contributing both visual design and hands-on development.
- Support ongoing website management and maintenance, including content changes, responsive layouts and functionality fixes.
- Translate program information into clear web experiences using WordPress, Divi and custom HTML, CSS and JavaScript.

capital-placement.com

Column | 2+ years

Brand identity, media and digital design, and website development

- Worked on brand identity development and translated the visual direction into media, digital designs and the website.
- Contributed to website development, connecting the brand presentation with a functioning online experience.

columncontent.com

Recruitable

Brand identity and website development

- Developed the brand identity and worked on the website, carrying the visual language into its digital presence.

JEZA OJERIAKHI

Development experience & creative background

PRACTICAL DEVELOPMENT WORK

Hands-on contributions to custom WordPress plugins and website features:

- **Lead capture:** worked on custom plugins and enquiry flows for collecting visitor enquiries.
- **Chatbots:** contributed to chatbot development for website interaction and visitor assistance.
- **Booking forms:** built forms to capture booking requests and the information required for follow-up.
- **AI-assisted search:** worked on a “Find Your Program” search experience to help visitors explore relevant programs.
